SUMMARY

Java Full Stack Developer with 5+ years building scalable enterprise applications using Java 17, Spring Boot 3.x, React 18, and microservices architecture. Delivered AI/ML integrations (fraud detection APIs, LLM-powered analytics, NLP pipelines) into production Java systems at Capital One and healthcare platforms. Expert in AWS EKS, Docker/Kubernetes, Kafka streaming, Jenkins CI/CD, and OAuth 2.0/JWT security. Reduced system latency 25%+ through optimized Spring Boot services and database indexing across banking, healthcare, and retail domains.

CERTIFICATIONS

AWS Certified Developer Associate

Oracle Java SE 11 Professional

IBM Enterprise Data Science

IBM Cloud - Based Mobile Solutions

SKILLS

Programming Languages	: JavaScript (ES6+), TypeScript, SQL, Python (for AI/ML integration), Java 17
Frontend Technologies	: HTML5, CSS3, JavaScript, AJAX, JSON, Angular, Redux, React.js
Backend Technologies	: Spring Boot, Spring MVC, Spring Cloud, Microservices Architecture, Hibernate/JPA, Spring Security, Mockito, JUnit
Cloud/Devops	: Jenkins, GitHub Actions, AWS, Azure, Docker, Kubernetes, Helm, CI/CD pipelines, Maven, Gradle
API / Security	: RESTful APIs, GraphQL APIs, OAuth 2.0, JWT, OpenID Connect, Swagger/OpenAPI, REST Assured
AI / Machine Learning	: Generative AI (GenAI), Large Language Models (LLM) Integration, Natural Language Processing (NLP), AI/ML APIs, AI-assisted Fraud Detection APIs, GitHub Copilot for AI-assisted development
Messaging & Streaming	: Apache Kafka, JMS, Event-Driven Architecture
Databases	: Oracle, MySQL, PostgreSQL, Cassandra, DynamoDB, MongoDB
Monitoring & Logging	: Prometheus, Grafana, ELK Stack
Version Control	: Git, GitHub
Development Tools	: IntelliJ IDEA, VS Code, Postman
Methodologies	: Agile (Scrum), DevOps, Unit Testing

EDUCATION

University of the Cumberland, USA - *Master's, Information Technology*

PRIST University, INDIA - *Bachelor's, Information Technology*

EXPERIENCE

Java Full Stack Developer, Capital One, Plano, United States	Jun 2025 — Present
- Developed 15+ Spring Boot microservices using Spring Cloud (Eureka, Gateway, Config Server) for real-time banking features, reducing API latency 28% via reactive programming and connection pooling. - Built AI-powered fraud detection platform integrating Python ML models (XGBoost, BERT) with Java services via Kafka streams; scored 92% fraud detection accuracy, cutting false positives 35%. - Engineered React 18 dashboards with real-time WebSocket updates and LLM chat interfaces for risk analysts, improving alert triage time 40%. - Containerized services with Docker, deployed to AWS EKS with blue-green deployments via Jenkins/GitHub Actions; achieved 99.95% uptime. - Implemented OAuth 2.0 + JWT with Spring Security across 20+ APIs; integrated Keycloak for SSO, significantly reduced authentication-related incidents. - Built ELK Stack dashboards monitoring 10M+ daily transactions, reducing MTTR from 4hrs to 45min. - Environment: Java 17, Spring Boot 3.x, Spring Cloud, React 18, Python (XGBoost/BERT), Apache Kafka, Docker, AWS EKS, Jenkins, GitHub Actions, ELK Stack, PostgreSQL, OAuth 2.0, Keycloak, WebSocket	
Java Full Stack Developer, NORTHSIDE HOSPITAL, Atlanta, United States	Oct 2023 — May 2025

- Architected patient management microservices using Spring Boot + Azure AKS; processed 50K+ daily appointments with sub-100ms response times.
- Integrated Apache Kafka for real-time lab results and notifications; implemented event sourcing pattern, cutting data sync delays 60%.
- Developed Angular 16 SPAs with RxJS for clinician dashboards; added AI anomaly detection for vital signs, flagging 87% of critical events early.
- Provisioned infrastructure with Terraform (Azure ARM templates); managed 50+ Kubernetes pods across dev/staging/prod, saving 20 hours/month in manual ops.
- Enhanced observability with Prometheus/Grafana + custom Spring Boot Actuator endpoints; reduced P99 latency outliers 32%.
- Environment: Java 17, Spring Boot 3.x, Angular 16, RxJS, Apache Kafka, Azure AKS, Terraform, Prometheus, Grafana, Spring Actuator, PostgreSQL

Java Full Stack Developer, Reliance Retail, Hyderabad, India

Feb 2022 — Jun 2023

- Built e-commerce platform with Spring Boot REST APIs + React 17 serving 2M+ SKUs; optimized MongoDB indexes, cutting catalog queries 25%.
- Implemented domain-driven microservices for order/inventory; used Kafka for async order processing, handling 10K orders/hour peak load.
- Refactored legacy SQL stored procedures to JPA repositories + caching; reduced database load 40%, enabling 3x concurrent users.
- Led CI/CD transformation with Jenkins + Maven; automated 90% of deployments, cutting release cycles from 2 weeks to 2 days.
- Environment: Java 11, Spring Boot 2.x, React 17, Apache Kafka, MongoDB, PostgreSQL, Jenkins, Maven, JUnit, JPA, Redis (caching)

Java Full Stack Developer, HDFC ERGO General Insurance Company, Bangalore, India

Apr 2020 — Jan 2022

- Developed claims processing system with Java 11, Spring Boot, GraphQL APIs; supported 100K+ policies with sub-200ms query performance.
- Integrated Apache Spark for insurance analytics; built fraud detection pipelines processing 1TB+ claims data daily, helped identify potential fraud worth \$2.3M.
- Implemented OAuth 2.0 + mTLS across partner APIs; achieved SOC2 compliance for claims data exchange with 50+ insurance partners.
- Migrated monolith to Docker microservices; reduced infrastructure costs 45% via AWS ECS auto-scaling.
- Environment: Java 11, Spring Boot 2.x, GraphQL, Apache Spark, Docker, AWS ECS, PostgreSQL, Cassandra, OAuth 2.0, mTLS
